

SOHAIL SADIQ

FULL-STACK & BLOCKCHAIN DEVELOPER

London, UK | 07361 244143 | ssohailssadiq@gmail.com | GitHub | linkedin.com/in/pgsohail

PERSONAL PROFILE

Full-Stack and Blockchain Developer skilled in Python, Rust, JavaScript and Salesforce Marketing Cloud, with hands-on retail and store management experience spanning KPIs, compliance, health & safety, emergency response and team leadership. Expert in AI, UI/UX design and cloud platforms (AWS, Azure, GCP), combined with strong verbal and written communication skills developed through customer-facing management roles. Delivered scalable fintech and marketing solutions with a focus on security, resilience and performance.

WORK EXPERIENCE

Full-Stack Blockchain Developer

Mar 2025 – Present

Philanthrify, London, UK

- Developed 10+ Rust-based smart contracts using MultiversX, securing fintech transactions for 5,000+ users.
- Integrated contracts into dApps with React/Node.js, boosting user engagement by 40%.
- Collaborated with cross-functional product and engineering teams, applying strong communication skills to document architecture decisions and support smooth stakeholder handover.
- Contributed to product roadmap planning, risk assessment and success-metric definition for blockchain features, partnering cross-functionally with engineering and business teams to align delivery with company goals in a fast-paced, ambiguous environment.

Full-Stack Developer & UI/UX Designer

May 2024 – Jan 2025

SkyElectric Pvt. Ltd, Islamabad (Hybrid)

- Designed and developed the SkyElectric Smart App with Flutter/GraphQL and AI-driven analytics, achieving 10,000+ downloads.
- Led marketing platform integration (Google Ads, Facebook Ads), lifting user acquisition by 30%, and optimized the Node.js/MongoDB backend, cutting API response time by 60%.
- Partnered and collaborated cross-functionally with product and marketing stakeholders, using clear communication skills to align feature roadmaps, ensure reliable service delivery, gather user feedback and maintain compliance with data privacy requirements.
- Supported retail operations and inventory management for SkyElectric's smart-home product line, applying visual merchandising and in-store styling techniques to strengthen consumer experience and product marketing at retail partner locations.
- Held leadership positions overseeing team development, KPIs and sales targets across retail and merchandising channels, developing training strategies for retail staff and providing consumer service and English language communication support to improve product knowledge, merchandising standards and consumer experience at the point of sale.
- Owned feature scope from ideation through launch, defining success metrics and roadmap priorities alongside Design and Engineering to shape the end-to-end customer journey and user experience.

Full-Stack Developer

Mar 2022 – Nov 2023

Disruptel, US/Remote

- Developed a React.js/GraphQL SPA, reducing load time by 50%.
- Optimized the Express.js/PostgreSQL backend, improving query speed by 65%.
- Worked closely with distributed remote teams across time zones, maintaining clear technical documentation and communication throughout the project lifecycle.

EDUCATION

Master's Degree in Artificial Intelligence Jan 2025 – Present

University of East London, London, UK

Machine Learning, Data Science, Cloud Computing, Blockchain, Embedded Systems, UI/UX Design

Bachelor's Degree in Software Engineering Jan 2020 – 2024

COMSATS University Islamabad, Pakistan

Web Development, Database Systems, Fintech Systems, Cybersecurity

Full-Stack Software Engineering Bootcamp Completed Mar 2023

App Academy, US

DevOps, AWS, Azure, Docker, Salesforce Marketing Cloud

TECHNICAL SKILLS

Programming: Python, Rust, JavaScript, C, Dart, HTML5/CSS3, SQL

Frameworks & APIs: Flutter, React, Vue.js, Node.js, Express.js, Flask, Angular, .NET, GraphQL, REST

Cloud & Data: AWS, Azure, GCP, MongoDB, PostgreSQL, BigQuery, Docker, Git, CI/CD

Blockchain & AI: MultiversX & Rust Smart Contracts, Machine Learning, TensorFlow

Marketing Tech: Salesforce Marketing Cloud (Journey Builder, Email Studio, Automation Studio), Google Analytics/Ads, Facebook Ads

PROJECTS

AR Shopping

- Built an AR try-on shopping application using Angular, GraphQL and TensorFlow-based computer vision models.
- Designed the UI/UX experience end-to-end, supporting 2,000+ user try-ons with a focus on usability and conversion.
- Integrated real-time AR rendering with a GraphQL API layer for fast, responsive product visualisation.

Crypto System (2022)

- Built a Java-based cryptography system applying AES encryption to secure data for 500+ users.
- Implemented secure key management to protect sensitive information at rest and in transit.
- Tested the system for security compliance, verifying robust protection against unauthorised access.

COMSATS Developers Club

- Led and delivered 10+ coding workshops, mentoring student developers in full-stack and blockchain technologies.
- Contributed to 3 open-source projects, collaborating with contributor communities via GitHub.
- Strengthened verbal and written communication skills through public speaking, workshop facilitation and technical documentation.

ADDITIONAL INFORMATION

- Achievements: 13,000+ LinkedIn followers; open-source contributor; fully funded Ignite project for AR.
- Languages: English (fluent)
- Interests: Blockchain development, football, literature & arts.
